

# Work from anywhere with confidence.

Tritus Hyperclient provides unmatched security and isolation for safer workforce mobility.

## Discover the leaders of next generation endpoint security.

Currently deployed in today's most hostile conditions, Tritus Hyperclient is a war proven security software solution.

Providing aggressive protection, our innovative engineers have led the industry in secure mobility. Fully tested and accredited, Tritus Hyperclient is utilized with confidence by the U.S. Federal government to safeguard sensitive data and devices.

Our years of experience serving the needs of DoD secret and top-secret classifications ensure that your organization will receive an unrivaled ultra-secure environment that satisfies CSfC MACP and DAR's most rigorous requirements.

## Tritus Hyperclient capabilities and features.

Compatible with the latest commercial hardware and scalable to meet mission specific needs.

Supports voice and video streaming over enterprise VDI.

Lost, stolen, or tampered with end point devices are immediately bricked, blocking all adversary attempts to access classified data.

Complete device isolation that addresses the three states of data security:

Data at rest

Data in transit

Data in use

## Built with the end user in mind.

The Tritus solution provides customers with a near native user-experience. There is no perceptible performance degradation even when visually intensive applications are in use.

Security measures are autonomously engaged without any required action on the part of the end user.

Tritus Hyperclient installs rapidly and can be patched remotely, ensuring advanced security while minimizing maintenance costs.

---

## Sealed at the hardware.

Uniquely installed below the operating system, Tritus Hyperclient provides the ultra-secure environment and transparent user experience demanded by America's most crucial government agencies.

### The Tritus portfolio of products include:

#### Tritus Hyperclient

Specifically designed for thin clients, laptops, and tablets to provide complete mobility while protecting sensitive information.

#### Tritus Patch/Installation (PI) Server

Provides configuration and remote updates, repair and patching of Hyperclients.
